

## Business Process Management and Modeling Support

Vistra brings experience, energy, and expert capabilities to help our federal clients achieve organizational excellence to better serve the American people. We accomplish this by identifying and measuring key performance indicators and administering detailed, exacting Business Process Management (BPM), Lean Six Sigma (LSS), and Continuous Process Improvement (CPI) methods to capture, evaluate, and report performance in both broad and specific categories across federal business enterprises. Our goal is to guide our clients in the directions they aim to move as efficiently and effectively possible while embracing good government best practices.

### Past Performance

### Lean Six Sigma

Vistra provides federal clients with BPM, LSS, and CPI methods to proactively reduce delays and meet or beat all deadlines by removing waste and reducing variations in federal government programs and processes. Always within the context of industry best practices, our BPM, LSS, Theory of Constraints, Business Process Reengineering, and Human-Centered Design are tested, calibrated, and applied across:

- Agile Program and Project Management
- Analytics and Data Mining
- Project Execution
- Modeling and Simulation
- Strategic Planning
- Development of Measures and Metrics
- Performance Management

Vistra's team of highly qualified experts with Master Black Belt and LSS certifications meet federal clients' BPM and LSS requirements by making use of relevant principles and integrating institutional knowledge and experience. Their laser-specific implementation of associated concepts and practices serves to:

- Methodically reduce waste
- Promote agility
- Support audits, feasibility studies, and assessments
- Improve efficiency
- Avoid/mitigate costs
