

Business Process Management and Continuous Process Improvement

Vistra's expertise in Business Process Management (BPM), Lean Six Sigma (LSS) and Continuous Process Improvement (CPI) methodologies helps our federal clients achieve organizational excellence. We work with clients to identify and measure key performance indicators and use data-driven approaches to capture, evaluate and report performance across federal business enterprises. Our focus is on guiding clients towards their goals while maximizing efficiency and effectiveness and adhering to best practices in government.

Past Performance

Lean Six Sigma

Vistra's application of BPM, LSS and CPI methods enables federal clients to proactively reduce delays, eliminate waste and meet or beat deadlines by removing inefficiencies and reducing variations in federal government programs and processes. We use industry best practices in our approach to BPM, LSS, Theory of Constraints, Business Process Reengineering and Human-Centered Design, which are tested, calibrated and applied across a wide range of areas, including:

- Agile Program and Project Management
- Project Execution
- Strategic Planning
- Performance Management
- Analytics and Data Mining
- Modeling and Simulation
- Development of Measures and Metrics

Vistra's team of highly qualified experts with Master Black Belt and LSS certifications deliver federal clients' BPM and LSS requirements by applying institutional knowledge and experience to industry-specific needs. Our implementation of associated concepts and practices serves to:

- Methodically reduce waste
- Support audits, feasibility studies and assessments
- Avoid/mitigate costs
- Promote agility
- Improve efficiency
